(54) Title: A METHOD FOR MOUNTING A TRAVEL VIDEO DISK PLAYER AND THE MOUNTING MEANS THEREOF

(54) 发明名称: 旅行用影碟播放机固定方法和装置

(57) Abstract: The invention discloses a method for mounting a travel video disk player and the mounting means thereof, in which the video disk player is mounted onto the rear surface of the seat back of an airplane or a travel vehicle by means of the mounting means, and the display screen of the video disk player is behind a display window of the body of the mounting means, i.e. a soft bag. The mounting means includes: a body which is a soft bag corresponding to the shape of the video disk player and is opened at its top; a pressing strip in a ligule form extended upwards from the center of the top edge of the front surface of the soft bag, the leading end of the pressing strip snapping with the top end of the rear side; a display window provided in the front surface of the soft bag, which corresponds to the display screen of the video disk player; and flexible circular longitudinal strips provided on the left side and the right side of rear surface of the soft bag respectively and having adjustable lengths. The video disk player is put into the mounting means when it is playing a disk and users can easily put the video disk player into the mounting means, thereby it may be convenient for users to view the video and the space occupied by the mounting means may be decreased.
